DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 16 June 2023 at 04:00 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: The UK should experience similar wind and weather conditions to much of the past week, helping to give widespread Moderate air pollution levels, perhaps with localised High areas, these more likely in the far south and southwest.

Tomorrow: Widespread Moderate air pollution levels are expected for much of the UK, but perhaps Low in the far south with the advance of more unsettled weather conditions.

Outlook: The extent of Moderate air pollution levels should reduce through this period, as more showery and unsettled conditions develop, perhaps becoming generally Low with surviving areas of Moderate by Tuesday.
